**Subject: Eustis Project, 2021 Dam Safety Inspection Recommendations
Plan and Schedule**

Dear Mr. Loon:

By letter dated September 23, 2021, you submitted a plan and schedule for addressing the recommendations included in the 2021 dam safety inspection follow-up letter for the Eustis Project. Specifically, in Items 1 and 2, we recommended that you place sandbags around the boil area to initiate periodic monitoring, and submit a conceptual design using a drainage blanket to properly filter and channel the seepage from the boil.

Subsequently, on October 19, 2021, you convened a conference call with D2SI-NRO staff to discuss your proposed plan for addressing the boil issue and conceptual drainage blanket design, as well as the significant hazard potential reclassification of the project. Based on the discussion, you proposed to modify your drainage blanket design concept to adequately address the inspection recommendations. You are required to submit by December 31, 2021 a revised drainage blanket design and weir design, including drawings for our review and approval.

File your submittal using the Commission's eFiling system at <http://www.ferc.gov/docsfilings/efiling.asp>. For all Dam Safety and Public Safety Documents, select Hydro: Regional Office and New York Regional Office from the eFiling menu. The cover page of the filing must indicate that the material was eFiled. For assistance with eFiling, contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY).

Thank you for your continued cooperation in this matter. If you have any questions regarding this letter, please feel free to contact Mr. Harold Kamara at (212) 273-5916 or by email at Harold.kamara@ferc.gov.

Sincerely,

John Spain, P.E.
Regional Engineer
