Re: December 14, 2021 – Supporting Technical Information Document (STID) Update  
Twin Cities Hydroelectric Project (FERC Project No. 362)

Dear Mr. Maguire:

The FERC received the referenced submittal providing an STID update for the Twin Cities Project. The update addresses Recommendation Nos. 12 through 30 from the 7<sup>th</sup> Part 12D Report (Section 1.3.7). As noted in the transmittal letter, Recommendation No. 25 had limited information available for the powerhouse foundation's timber piles and thus, no update to the STID specific to this recommendation was made.

The transmittal letter also noted that STID's reference CD was sent to the FERC Chicago Regional Office. The complete electronic STID update satisfactorily conforms to Chapter 14, Appendix I, Guidelines for Supporting Technical Information, of the Engineering Guidelines.

Please contact Mr. Scott Airato, P.E. at (312) 596-4431 ([scott.airato@ferc.gov](mailto:scott.airato@ferc.gov)) or me at (312) 596-4430 if you have questions regarding this correspondence.

Sincerely,

*for* John A. Zygaj, P.E.  
Regional Engineer
